# Viewport Navigation

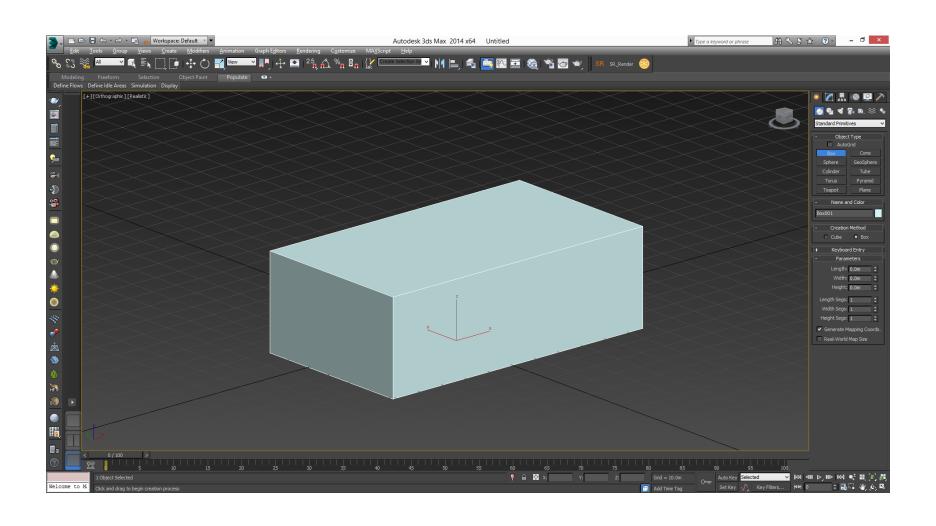

บอบประเบพของห์ททอง

## Perspective

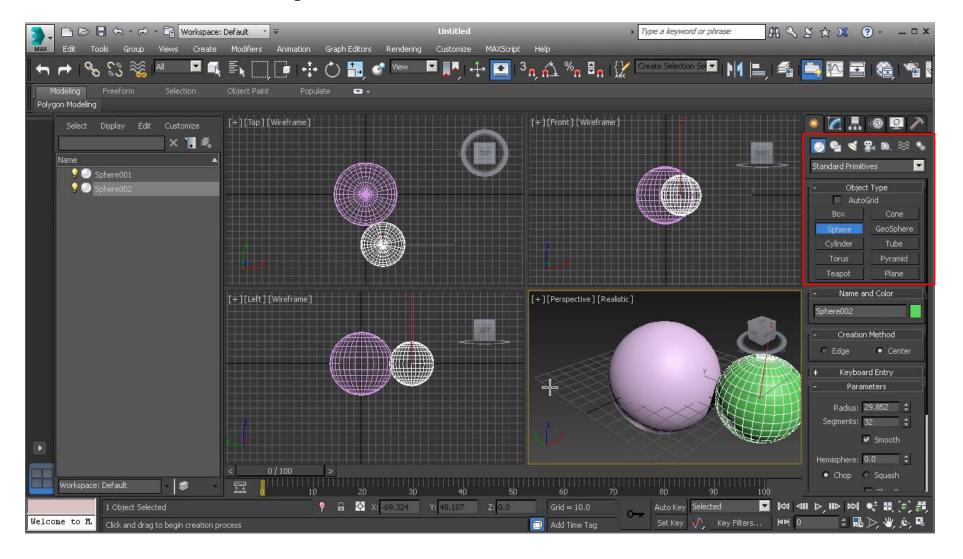

# Orthogonal

## Viewport selection

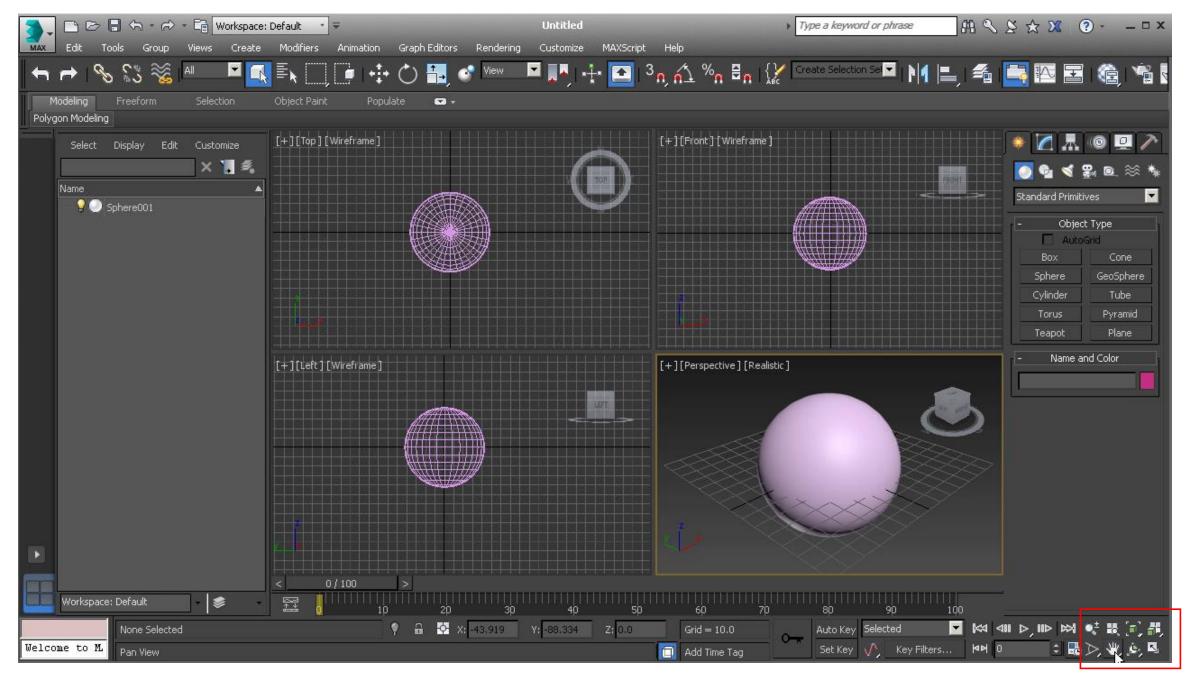

- Left mouse
- Middle mouse
  - ปลอดภัยกว่าเพราะไม่ไปรบกวน selection

#### Create object

ลองสร้าง object ชนิดอื่น ใน viewport ที่ต่างกัน

หยุดสร้างให้ใช้ right click

Viewport navigation tools

## Viewport navigation tools

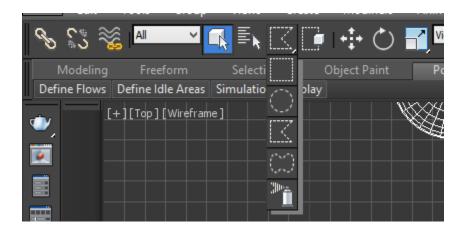

- Pan
- Orbit
  - อิสระ 🗕 ในวงกลมสีเหลือง

  - เลือก object กับไม่เลือกต่างกันอย่างไร?
- Maximize viewport
  - Alt + w

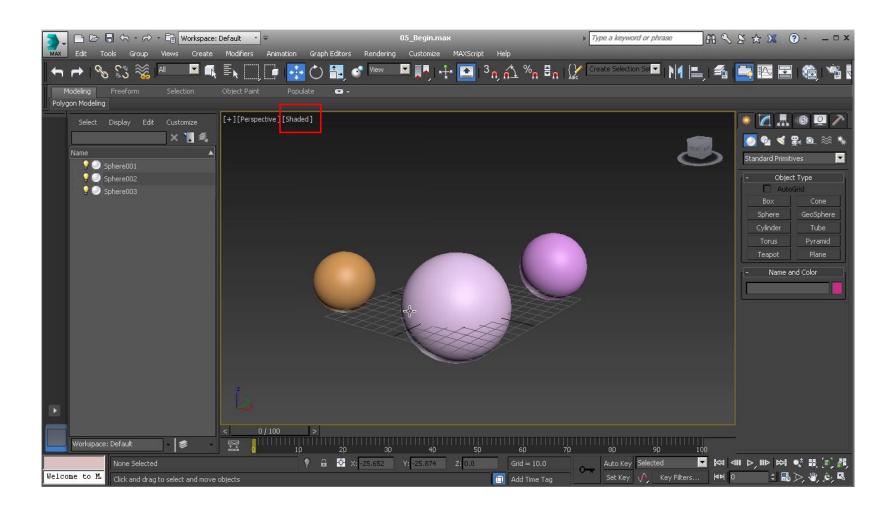

#### Selection

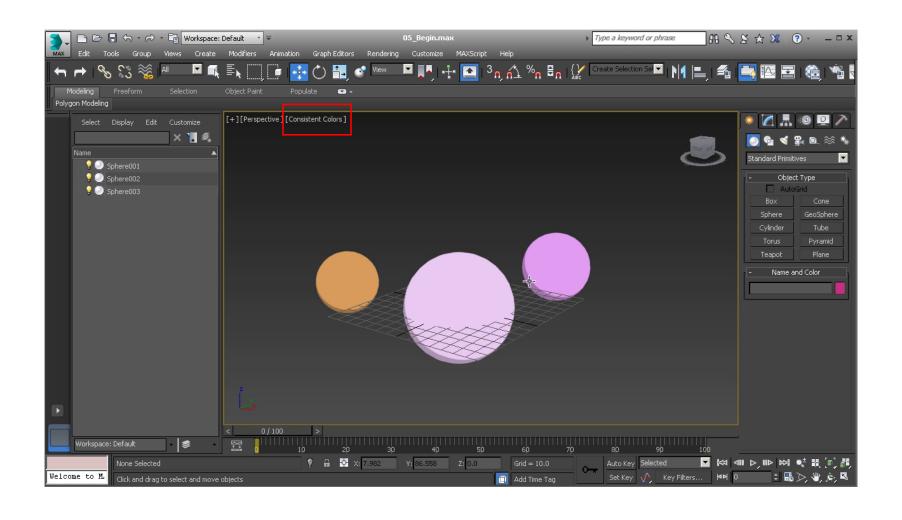

- Left click on an object
- Multiple selection
  - Hold down Ctrl
  - Remove by holding down Alt
- Marquee selection
  - Lets try
- Window / crossing
  - Cover all or just cross
- Selection in scene explorer

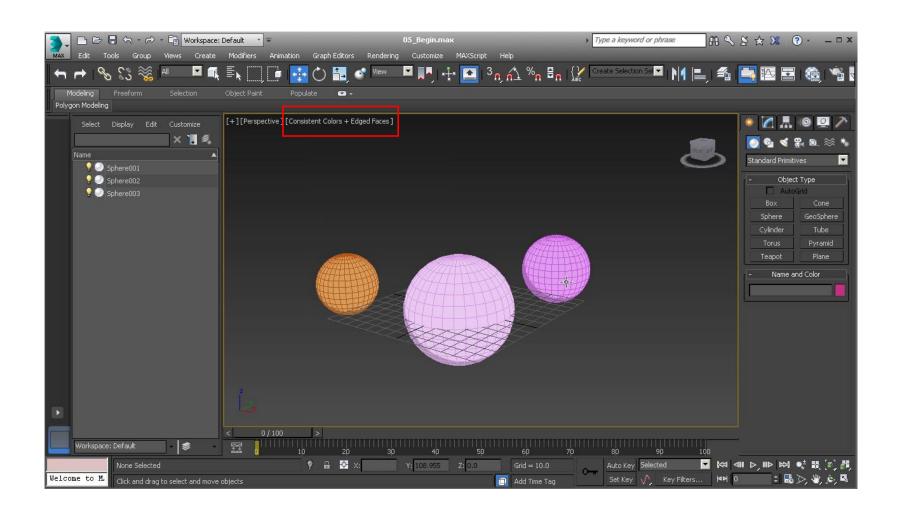

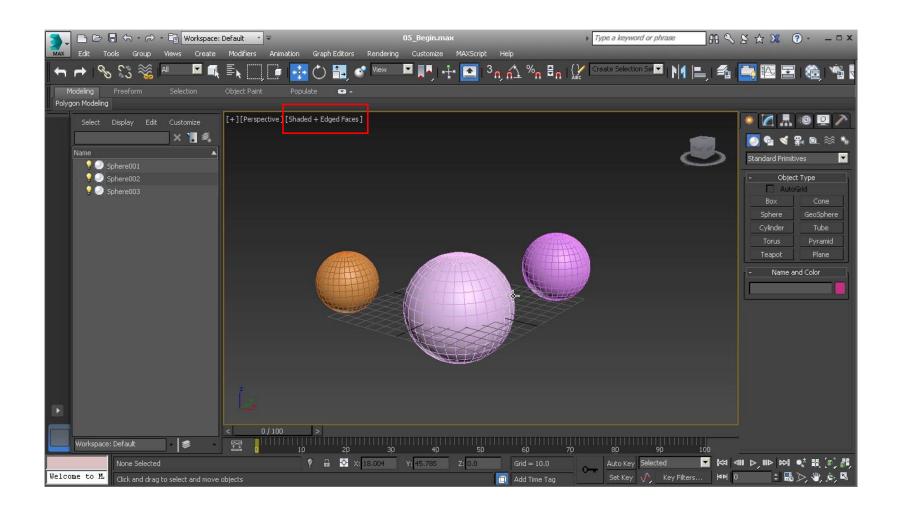

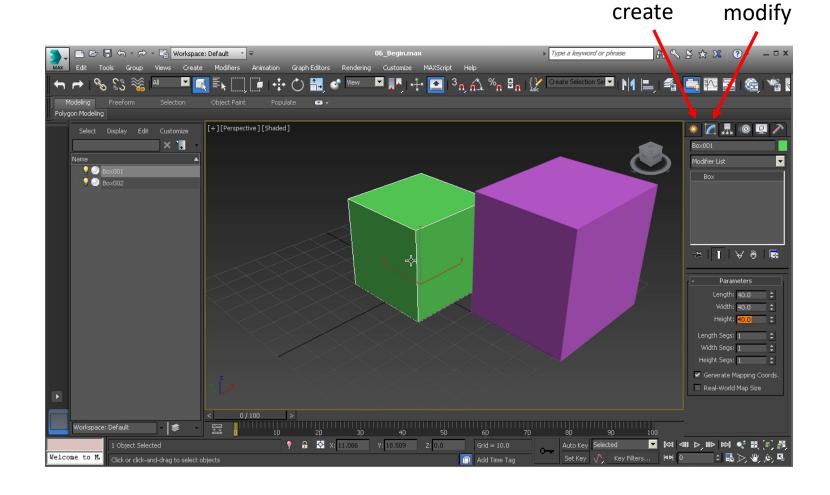

# Creating and manipulating geometry

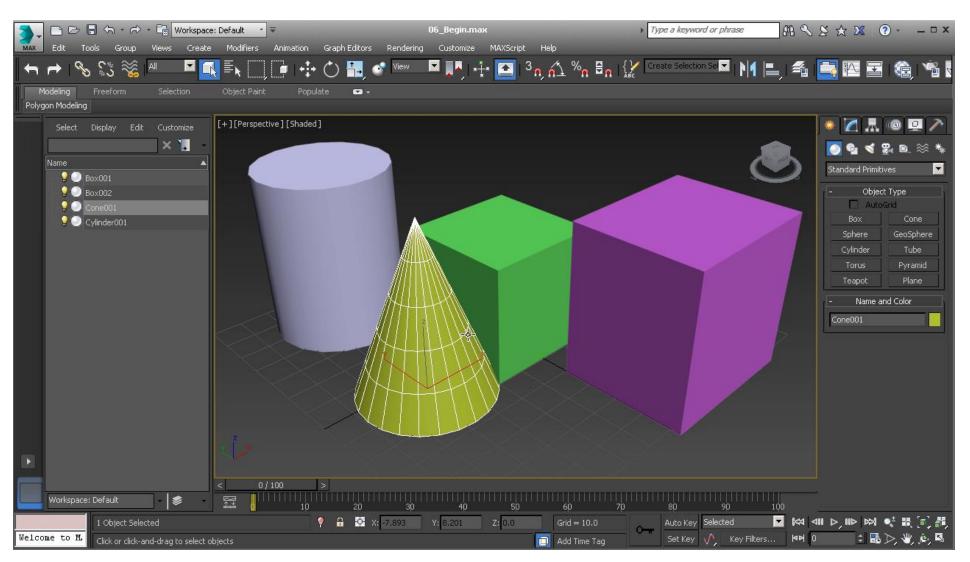

#### Box

- Cube vs box
- Create and modify
- Segments

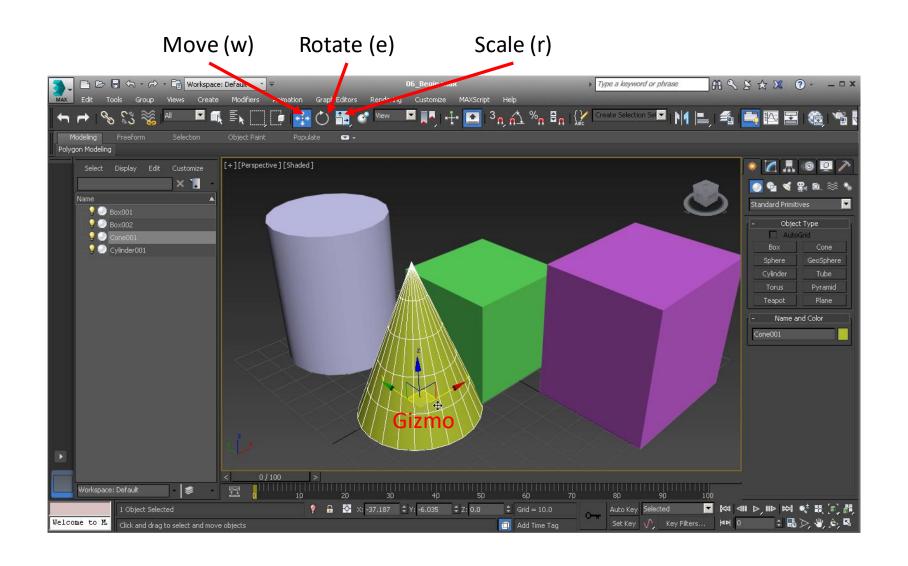

#### Try the others

- Sphere
- Cylinder
- Cone

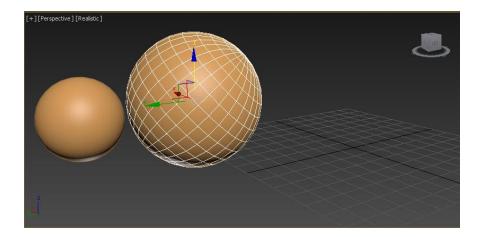

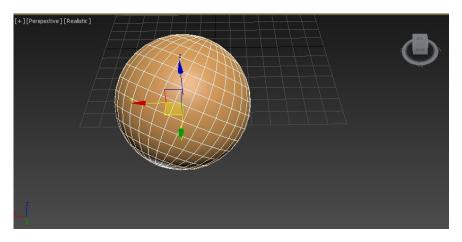

### Manipulating

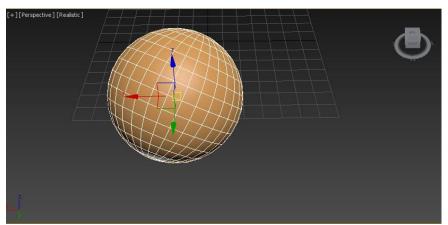

#### Move

- Along an axis
  - Red -x
  - Green y
  - Blue z
  - Yellow activated
- Along a plane
  - Yellow plane
- Freely
  - Small yellow cube

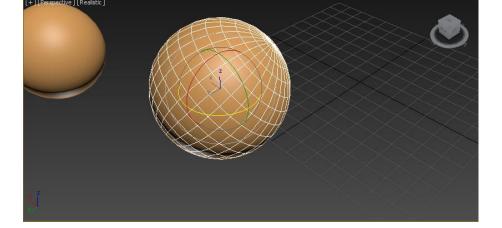

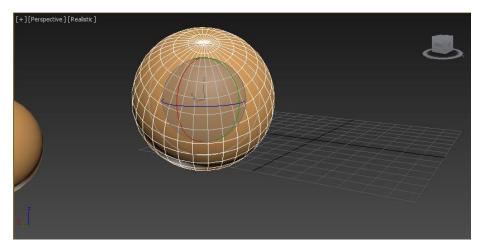

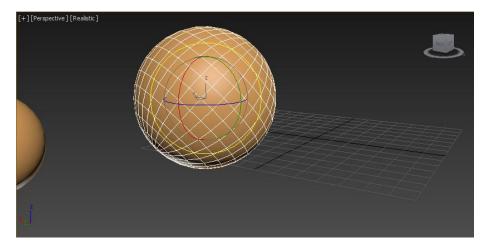

#### Rotate

- Around an axis
  - Red -x
  - Green y
  - Blue z
  - Yellow activated
- Freely
  - Any where in the gray sphere
- Around the view axis
  - The gray → yellow circle

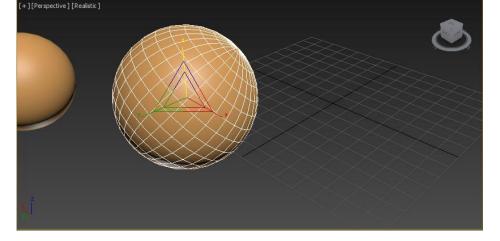

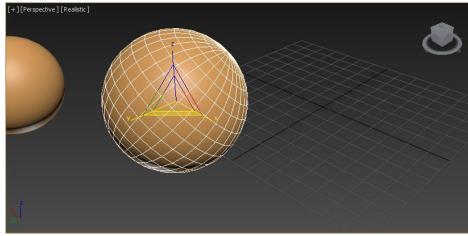

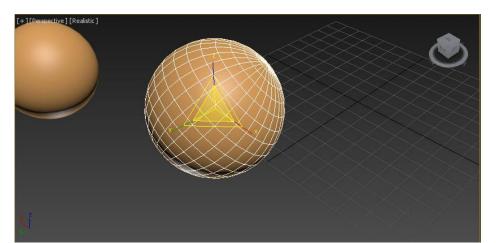

#### Scale

- Along an axis
  - Red -x
  - Green y
  - Blue z
  - Yellow activated
- Along a plane
  - Yellow plane
- All axes
  - The inner triangle

# Lets try creating a simple object
